Work Experience

Software Developer (Contract), Bank of America, Chandler, Arizona Jun 2025 - Nov 2025

- Built and maintained TypeScript, React.js web application with reusable components and state using React Hooks.
- Optimized JavaScript workflows with Promises, async/await, and lazy loading to improve API performance
- Integrated React Query and React Hooks for optimized API fetching and state handling, improving UX and stability.
- Improved web application performance and responsiveness through UI optimization and API integration.

Full Stack Developer, 6D Technologies, Bangalore, India Nov 2021 - Aug 2023

- Designed and developed object-oriented, scalable architectures using React.js and TypeScript for telecom platform.
- Built real-time dashboards with WebSockets and Chart.js to visualize network performance for telecom clients.
- Translated Adobe XD designs into responsive JSX layouts using Tailwind CSS, reducing UI bugs.
- Built a React infinite scroll pagination component to optimize performance and user experience in dashboard page.
- Created reusable UI components, implemented Redux Toolkit with React Router to streamline complex workflows.
- Optimized telecom client DMS APIs using Node.js, Express.js, and MongoDB enhancing efficiency and performance.
- Automated CI/CD pipelines using Docker, GitLab, and Kubernetes for reliable microservice deployment.

Software Development Engineer, Cognizant Technology Solutions, India Apr 2020 - Nov 2021

- Delivered accessible React.js and Next.js interfaces in TypeScript, following WCAG 2.2 AA standards.
- Built React custom hooks and Functional components for a 10+ module ServiceNow portal, accelerating UI delivery.
- Maintained Jest and Cypress tests for frontend workflows, improving coverage and reducing regressions.
- Engineered REST APIs with Node.js and Express.js, integrating Keycloak authentication, creating SQL schemas, and connecting database models to API routing, tested endpoints in Postman.
- Deployed application on AWS EC2 instances and integrated S3 storage for static assets and customer data backups.
- Collaborated in Agile activities, sprint meetings, and demos, communicating with product and technical teams.

Projects

Emotionsense AI

- Integrated OpenAI Whisper and GenAI models to process audio, extract transcripts, and detect real-time emotions.
- Built an AI pipeline using TensorFlow, Keras, and NLP tools, applying NNFL fine-tuning for emotion recognition.
- Developed a React.js interface to visualize emotion states with color mapping and a responsive UI.

TAOVIX (TA Management System)

- Built secure, responsive, and accessible role-based web interfaces using React.js and Next.js.
- Built secure RESTful APIs with Node.js, Express, and MongoDB using JWT to manage role-based access

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, HTML, CSS, JSON, jQuery, ES6+

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS, Angular, GraphQL, Material UI, React Testing Library, React Native

Tools & Platforms: Docker, Kubernetes, AWS (EC2, S3), Linux, GitLab CI/CD, Vite, Git, npm, Jira, Jenkins

Databases & Testing/Monitoring: MongoDB, MySQL, PostgreSQL, SQL, Redis, Cypress, Jest, Dynatrace

Design & Others: Agile, Scrum, Data Structures, OpenAI, Adobe XD, LangChain

Certifications and Achievements

- AWS Certified - Cloud Practitioner, Meta React Front-End Developer, Micro Frontends with React
- Solved 400+ coding challenges on LeetCode, GFG, and HackerRank, demonstrating algorithm expertise

Education

Florida Atlantic University, Boca Raton, FL

Aug 2023 – May 2025

Master of Science, Computer Science | GPA: 3.5/4
